Veer Surendra Sai University Of Technology   Expected Grad : 2025
BTech in Electronics and telecommunication   *CGPA: 8.03/10 (till 7th Sem)*

EXPERIENCE

GiveGet – Fullstack Web Developer – UI/UX Designer
Nov 2023 - Jan 2024 – Remote

- Developed the ecommerce seller platform using the MERN stack, focusing on seamless user experience and backend integration.
- Designed all pages of the platform using Figma, ensuring a visually appealing and user-friendly interface.
- Implemented AI-driven listing creation and personalized store features to enhance user engagement and efficiency.

Graduate Us – Frontend Web Developer – UI/UX Designer
Jan 2023 - July 2023 – Remote

- Developed a student web-based application with dynamic pages, including an attendance tracker, CGPA calculator, and internship finder.
- Utilized Figma for UI design and Next.js, Material-UI, and JavaScript for responsive development.
- Built an admin panel dashboard for efficient management and streamlined content updates.
- Enhanced user interaction and engagement, making the platform a valuable tool for students.

Wasper Tech – Frontend Web Developer – UI/UX Designer
May 2023 -July 2023 – Remote   *Bhubaneswar, Odisha*

- Developed a user-friendly ONDC e-commerce frontend platform using Figma, React.js, Material-UI, and JavaScript.
- Contributed to the creation of onboarding pages and dynamic pages, including a dashboard for orders and inventory management.
- Streamlined ecommerce operations with efficient billing, inventory, product-adding, profile, and blog features.

PROJECTS

Personal Portfolio | Reactjs , Javascript , Expressjs , MongoDb , Mui , Framer | Link

- I have created a personal minimal portfolio that combines sleek design and simplicity to showcase my work effectively and professionally.
- I possess expertise in creative animation with framer-motion

Xpenso | Nextjs ,Expressjs, MongoDb, Material Ui , Javascript , Figma | Link

- Developed a visually appealing Neumorphic UI for an intuitive and modern expense tracking experience.
- Implemented a streamlined system for recording detailed expense transactions, including date, amount, and description.
- Ensured secure user authentication using JWT web tokens and integrated a notification system for high expenses, promoting financial awareness.

Doc-Care | Nextjs-14 ,Javascript ,Material Ui, Express-js , Twilio(SMPP) , Stripe ,MongoDb | Repo-Link

- Developed a robust backend featuring RESTful APIs for efficient patient and doctor management. Integrated JWT token authentication to ensure secure data handling and system scalability.
- Simplified appointment scheduling with doctors by integrating Stripe, enhancing user convenience and transaction security.
- Currently focusing on frontend development to enhance user interaction.
